

LINC SAFE

LOCAL INTELLIGENT NETWORK CONNECTED SAFE

THE **SMART & SECURE** SOLUTION
FOR **CASH**
MANAGEMENT!

HOW DOES **LINCSAFE** HELP YOU WITH YOUR DAILY **CASH HANDLING**?

Cash as part of many retail payment transactions is a reality. Despite various technological developments, cash payments account for 78%* of all of Europe's retail transactions. At present experts expect cash to remain the predominant method of payment. Cash payments are a major source of worry for retailers. Checking and counting of cash monies takes time and is expensive. Moreover it can be unsafe due to the increased and high risk of robbery. On the other hand cash payment provides a consumer-friendly atmosphere. Consumers often like to pay cash and invariably have cash

with them, as opposed to debit cards and credit cards which not everybody has. LINCSAFE is the perfect solution for creating a closed cash handling process (checking, counting and secure storage). Closed cash handling allows the efficient processing of cash monies while reducing the risk of (armed) robbery, burglary and (internal) theft. LINCSAFE helps you to offer a secure and consumer friendly shopping environment, whilst also saving you valuable time and money!

(*Retail Banking Research, 2010)

1

LINCSAFE checks, counts and stores the deposited money safely in a cassette in the burglary resistant safe.

- Each deposited banknote is processed as a separate transaction for auditing.
- Real-time information about LINCSAFE's status and amount of deposited money via webportal and the display on the safe.

2

Optional provisional crediting.

- At cutoff time all transactions are checked/processed and the bank receives a request to credit customers' account with the value of today's cash deposits.
- The CIT-company receives events and deposit-updates all day to allow quick reaction to cash handling issues or when CIT collection is required (cash levels reached).

3

The CIT-company arranges the transportation of cash monies as soon as LINCSAFE has reached the insured level. No action is required on your side.

- Totals are automatically reset (put to zero) as soon as the CIT-company has placed a new cassette in the LINCSAFE.

4

The CIT-company counts the collected cash monies and will

(depending on the chosen services):

- Return the money to the bank (in case of provisional credit).
- Ask the bank to credit your account (in case of no provisional credit).

TFT DISPLAY

Easy to control and quickly view the LINCSAFE's status. 7 inch touchscreen.

COUNTERFEIT DETECTION

Banknotes are instantly checked by 100% ECB-tested readers.

SECURITY

The strong (Grade II certified) built safe offers protection against robbery, theft and internal fraud.

SIDESAFE (OPTION)

Sidesafe for vouchers and coins.

WEBPORTAL

Realtime information about content and status of your LINCSAFE(S).

REMOTE CONTROL

The safe offers remote access for control, update and user administration.

REPORTING

Detailed transaction reports and consolidated reports on various locations.

SECURE

- Cash money is immediately checked, counted and stored safely out of sight in the LINCSAFE.
- The LINCSAFE provides heavy duty burglary resistance according to SAFE 3 (Sicherheitsstufe B) or EN 1143-1 Grade II or III.
- The automatic counting and the automatically planned cash transportation mean 'fewer hands' touch your money, strongly reducing the risk of internal fraud.
- No counting discrepancies between bank deposits and the final count by the CIT-company.
- Counterfeit detection completely eliminates the risk of counterfeit notes and revenue loss.
- You offer a consumer friendly and safe shopping environment.

EFFICIENT

- Employees who deposit money are automatically identified in the system through their badge, identification card or personal login.
- Each deposit is recorded as a transaction and can be connected to your backoffice and/or CIT.
- Realtime insight into deposits of various employees.
- Open, save and print various detailed reports.
- Totals of your LINCSAFE(S) can be processed directly in your administration system.
- Reduced workload for shop managers or store owners because of the sizable reduction of cash handling (deposits and counting).

COST REDUCTION

- No bank credit facility required to bridge the time between the receipt of cash payments and the crediting of your bank account. Cash money is almost immediately available on your bank account.
- Fewer visits of CIT-company (cost reduction). Furthermore the CIT-company takes care of planning cash transportation.
- Save valuable labour and therefore money. You have more time and money for your customers and shops.
- Can optionally be integrated with your POS system to match the deposited amounts with the cash register totals.
