

### The most important features

- Sterilisation of banknotes during the counting process via plasma air ionisation
- Removes up to 99.97% of microbes / viruses / bacteria, including the SARS-CoV-2 / Covid 19 virus
- Additional dust protection for the counting machine
- Available in 2 sizes

Picture shows DS 1000 including counting machine, this is not included in the scope of delivery, but can of course be purchased from us.

The DS 1000/1001 sterilisation systems sterilise the banknotes during the counting process and kill the microbes, viruses and bacteria on the banknotes. The banknote counting machine continues to run as usual during the counting process in the system and is connected to the power supply inside the system.

### FEATURES

- 99,97 % sterilisation of the banknotes during the counting process via plasma air ionisation
- Banknote counters continue to run with all functions during the process
- Works with cotton or polymer-based banknotes
- Additional dust protection for the counting machine when the machine is not in use
- 2 independent laboratories have confirmed the function
- Simple and safe to use

### TECHNICAL SPECIFICATION

- **Cabin 1 for Frontloader 1 Pocket to 2 Pocket:**
  - Dimensions: 450 x 490 x 540 mm
  - Weight: 14 kg
- **Cabin 2 for Multi-pocket machines**
  - Dimensions: 450 x 490 x 750 mm
  - Weight: 17 kg
- Power supply: 230 V / 50/60 Hz.
- Certificates: CE, RoHS, laboratory reports
- Guarantee: 12 months

### OPTIONAL ACCESSORIES

- EU - Power cord (Art. No. A007120)
- UK - Power cord (Art. No. A007121)
