

	<p style="text-align: center;"><u>The most important features</u></p> <ul style="list-style-type: none"> • Sterilisation via plasma air ionisation • Removes up to 99.97% of microbes / viruses / bacteria, including the SARS-CoV-2 / Covid 19 virus • Ideal for clothing and shoes, whether at the return of clothes or in the company where items of clothing are used by several employees (protective jackets) or for cleaning at the end of the working day • Available in different colours
---	---

The DS 3000 sterilisation system ensures sterilisation of the contents of the mobile cabinet box and killing of bacteria, viruses and bacteria. Particularly in the dressing area, infection can quickly occur when clothes are tried on by different people. But even in areas where no personal protective equipment such as protective jackets, helmets or similar is used, the risk of spreading within the company is present. The possibility of sterilising the clothes at the end of the working day makes the DS 3000 interesting for many industries and companies.
